EDUCATION

University of Minnesota, Twin-Cities

Minneapolis, MN

Bachelor of Science, Computer Science

Aug. 2023 - May 2027

- **Activities:** National Society of Black Engineers (NSBE), Intramural Soccer/Basketball
- **Awards:** Spring 2025 Deans List, Intramural Soccer Champions Fall 2023/Spring 2025
- **Relevant Coursework:** Linear Algebra, Intro to Statistics, Discrete Structures, Data Structures, Machine Architecture & Organization, Advanced Programming Principles, Physics II, Intro to AI, Program Development

EXPERIENCE

Masonic Institute for the Developing Brain

May 2024 - Present

Computational Neuroscience Intern

Minneapolis, MN

- Designed, developed, and maintained a **Python-based GUI** using the **PyQt5** library to automate training of an existing brain segmentation model, reducing training time by over 100%.
- Collaborated with 4 research professionals on integrating several AI models into existing lab-wide research pipelines.
- Created **Python** and **Unix Shell** scripts to streamline dataset curation to automate organization on datasets with 2000+ subjects for efficient downstream processing.
- Delivered 3 technical talks to 20+ researchers detailing updated brain segmentation models and strategies for integration.

Roblox (Self Employed)

Apr. 2025 - Present

Game Developer

- Built gameplay mechanics and connected UI systems in Lua, optimizing user experience across mobile, console, and desktop platforms
- Designed and implemented Blender 3D models and Figma UI graphics enhancing visual quality.

Minnesota Timberwolves & Lynx

Sept. 2021 - Present

Team Attendant / Equipment Staff Assistant

Minneapolis, MN

- Provide on-court support to players, coaching staff, and officials to ensure smooth game operations.
- Managed inventory and equipment logistics for the Minnesota Timberwolves throughout the 23/24 and 24/25 seasons.

PROJECTS

AI Model Training & Brain Segmentation GUI (Python, PyQt5, Unix/Shell, U-Net, nnUNet)

- Built batch job submission scripts and supported multi-model training, simplifying setup requirements and enabling parallel runs across different datasets and hyperparameter configurations without manual code alterations.
- Integrated real-time progress tracking (**TQDM**, **stdout capture**) within the GUI to monitor training and batch executions.
- Worked directly with **Python**-based ML tooling including **PyTorch**, learning how to manage training runs, handle long-running processes, and integrate Linux/Unix shell scripts into scalable ML pipelines.

Stock Price Prediction & Visualization (Python, C++, Qt, SQL)

- Designed application UI in **Figma** and implemented it in **Qt**, wiring interactive GUI components for data retrieval, model inference, and chart updates.
- Integrated the GUI with a **SQL** database to persist user-specific application state such as selected presets, historical prices, and model outputs enabling faster retrieval and consistent analysis across sessions.

TECHNICAL SKILLS & INTERESTS

- **Languages:** Python, Java, C/C++, OCaml, Bash/Unix Shell, Lua
- **ML/AI:** PyTorch, TensorFlow, Scikit-Learn, NumPy, Pandas, OpenCV, CNNs, Model Training & Evaluation
- **Tools & Frameworks:** PyQt5, Git, Linux, Docker/Apptainer, Slurm, JSON/YAML, CLI Tooling
- **Interests:** Machine Learning, Computer Vision, Hip-Hop, Game Development, Music History, European Soccer
